COMPANY OVERVIEW

Vision

The mission of the board of A Rapid Building Solutions is to achieve the highest standards in the practice of making steel buildings. Our vision also describes the long run objective of bringing innovations to improve the way the world works and lives

Mission

To supply high-quality steel products, providing related services and solutions to a worldwide clients base while utilizing innovative technologies within an environment of motivated employees, focused on continuous improvement, highest business standards, work ethics and corporate citizenship, leading to added value for our customers and sustained return on investment to our shareholders.

OUR VALUE

A Rapid Building Solution follows good manufacturing, laboratory and documentation practices that ensure consistent high quality results. Our state-of-the-art analytical facilities monitor and maintain strict quality of our products, processes and services, consistently meeting national and international quality standards.

Unmatched product quality is our claim to fame. To achieve this and provide it consistently we make sure that every product undergoes various quality control checks. Our full-fledged testing facility to inspect incoming raw materials as well as finished products thoroughly to comply with all the requisite quality norms and standards.

COMPANY BENEFITS

A Rapid Building Solution follows good manufacturing, laboratory and documentation practices that ensure consistent high quality results. Our state-of-the-art analytical facilities monitor and maintain strict quality of our products, processes and services, consistently meeting national and international quality standards.

Unmatched product quality is our claim to fame. To achieve this and provide it consistently we make sure that every product undergoes various quality control checks. Our full-fledged testing facility to inspect incoming raw materials as well as finished products thoroughly to comply with all the requisite quality norms and standards.

Quality Assurance (QA) is responsible for implementation of quality systems and release of all manufactured products. It develops and ensures harmonisation of all systems throughout the organisation. It is also responsible for all audits including regulatory (national and international).

WHAT TO EXPECT

What You Can Expect From Us

- **§ Strategically located excellent infrastructure, machinery and well placed quality system.**
- **§ All manufacturing activities are performed in-house. Therefore no depending on any outside sources or organizations.**
- **§ Market segments, refineries, steel plants, solar plants, infrastructure projects & power plants, rail bridges. High rise building and piping.**
- **§ Advantage of extremely professional engineers and highly qualified employees.**

What We Expect From You

- **We expect a great support and a lifetime relationship with our client.**

WORKPLACE ENVIRONMENT

Company Property

We have certified engineers all across India. These Engineers have undergone an intensive training on erecting buildings for different applications and of varying complexity. Our Engineers are highly competent and offer skilled expertise to clients. The local builder certified by A Rapid Building Solutions offers comprehensive services from construction to complete turnkey solutions.

Company Facilities

We have an excellent track record as a manufacturer of Heavy structures & Equipment building services as per customer's unique requirement. We have the requisite experience, expertise and competence to manufacture products for different industry segments like Power, Steel, Cement and material handling as per customers design & specifications as we have fabricated critical electromechanical structures like Gates, Hoists, and Aqueducts involving precision.

ADVANTAGES OF STEEL STRUCTURED BUILDINGS:--

- **Strict tolerance**
- **Recyclable**
- **Cost effective**
- **Less maintenance: Steel structured buildings**
- **Flexibility**
- **Reduces infestations**

Structural steel fabrication process

The structural fabrication process involves multiple stages. This process requires skilled and experienced technicians who can take raw components and transform them into quality products. Each of the processes is discussed below
